Understanding the world

How can we describe where we live and the world around us?

1

Geographical skills and fieldwork

What human and physical features can you identify on plans and aerial photographs?
What symbols will you use when creating a key for your own map?

Locational Knowledge

How are the world's seven continents and the UK (and its countries) presented on a map, atlas and globe?
What are the characteristics of the four countries and capital cities of the UK?

2

Geographical skills and fieldwork

How do we use a compass and positional language to describe routes and locations on a map?

Human and physical geography

What geographical vocabulary can you use to name key physical features?
How are the seasons and weather in the UK different to countries closer to the equator or the North and South Poles?

Human and Physical Geography

What impact is litter and pollution having on our local area?

Place knowledge

What are the geographical similarities and differences between an area of the UK and another contrasting area of the world?

Human and Physical Geography

How do humans function in the place they live? How are natural resources distributed in an area or country?
What are the physical processes, including weather, that affect two different locations?

3

Geographical skills and fieldwork

How do you describe the location of routes and features on a map using compass directions? What countries, continents and oceans can you identify on a globe and atlas?

Place Knowledge

What similarities and differences in physical and human geography are there between continents?

Human and Physical Geography

What are some key physical features and environmental regions of North America and how these, along with the climate zones and soil types, can affect land use?

4

Geographical skills and fieldwork

What are the features of elevated areas, depressions and river basins on a relief map?

Human and Physical Geography

How can we describe a range of human features and their location and how they are interconnected?
What processes are involved in the formation of mountains and rivers?
What are the major types of mountains?

Place knowledge

Where in the world can significant rivers and mountains be found?

5

Locational knowledge

What are the names and locations of significant volcanoes and plate boundaries and why are they important?
What are the key physical and human features of the world's countries and their capital cities?

Human and physical geography

What are the processes that cause significant geographical activities such as earthquakes and/or volcanoes?
What are some names and descriptions of the types, appearance and properties of rocks?

Place knowledge

What similarities and differences in physical and human geography are there between continents?

Locational knowledge

What are the names, locations and distribution of significant industrial, farming and exporting regions around the world?
What are some of the issues faced by developing countries and how can they be supported?

Geographical skills and fieldwork

What geographical information can satellite imaging and maps of different scales tell us about a place?
How can we analyse, compare and present increasingly complex data?

6

Human and Physical Geography

How do humans function in the place they live? How are natural resources distributed in an area or country?
What are the physical processes, including weather, that affect two different locations?
